40 Function and IP Transmitter with Shift

SYSTEM PART NUMBER

92340 2 x 20 Function Receiver

1 x 20 Function IP Transmitter with Shift Buttons.

(40 Function in Shift Mode)

CONTENTS

2 x Receivers

1 x IP Shift Transmitter

1 x Lanyard 1 x Instructions

REPLACEMENT TRANSMITTER

92320TX - **2**0 Function IP Transmitter with Shift Buttons. **(40 Function in Shift Mode)**

REPLACEMENT RECEIVER

9220RX - 20 Function Receiver **9220RX** - 20 Function Receiver

TRANSMITTER SPECIFICATION

ENCLOSURE

Material ABS

Switch Type Tactile Dome on PCB Keypad
Functions 20 (40 with dual function buttons)
Identification Pockets for printed text or image insertion

RF

Modulation 2-GFSK. Gaussian Frequency Shift Keying

Frequency 433.050 MHz to 434.790 MHz

Channels 1 Channel Selection Fixed

Technology Hand-held Transmitter

Temperature Range -10° C to + 40° C (13 $^{\circ}$ F to + 104° F). Use Lithium for lower temperatures

Range 60m (200ft)

Aerial Internal – printed on PCB

Transmitted power 1mW Typical

POWER

Batteries 4 x AAA Alkaline Manganese in holder (6 Volts)

 $\begin{array}{ll} \text{Quiescent Current} & 15 \mu \text{A} \\ \text{Current Transmitting} & 20 \text{mA} \end{array}$

PROTECTION

IP Rating 65

Registration codes Over 16 million

INDICATOR

Type 1 x Red LED

Off Transmitter is OFF and in standby mode

Slow flash Transmitter is ON and ready for use (The SET Button has been pressed and released)

On Transmitting (A STOP, SET or Function Button is being pressed)
Fast flash Transmitting – Indication that the battery will need replacing soon

Enclosure Slow Flash ON and ready for use with Receiver 2. The SET button has been pressed and released

COMPLIANCE

FCC FCC CFR 47-part 15.231

433.9MHz

IC ISED RSS-210 Issue 8

433.9MHz

RoHS Directive 2011/65/EU

RECEIVER SPECIFICATION

ELECTRICAL

Voltage Nominal 12/24V DC Voltage Min/Max 8 to 36V DC

Switch Type MOSFET (Positive Switching)

RF

Modulation 2-GFSK. Gaussian Frequency Shift Keying

Frequency 433.050 MHz to 434.790 MHz 902.025 MHz- 927.975 MHz

Channels 32

Channel Selection Fixed

Channel hopping

Technology Fixed Receiver

Temperature Range -40° C to $+80^{\circ}$ C $(-40^{\circ}$ F to $+176^{\circ}$ F).

Range 60m (200ft)

CURRENT CAPACITY

FET Rating 10A System Rating 10A

Quiescent Current 31mA 12V/ 17mA 24V on Standby (Not SET)

Overload Protection 10A (Auto Shutdown)

AERIAL

Internal Antenna Yes Supplied and fitted

External Antenna Optional AC9860/ AC9861/ AC9862/ AC9863 & AC9869 – order separately

OUTPUTS

Master Yes Parallel or Continuous Function 40 (20+20) Supply to Receiver is switched

CONFIGURATION

RS232 Programming Yes For programming interlocks, push/push latch, parallel master inhibit, timeout, channel timeout delay,

to users' requirements master on delay, radio button de-latching and output allocation.

PERFORMANCE

Simultaneous Outputs Yes Programable (Modify through configuration)
Instant TX response Yes Programable (Modify through configuration)

DIAGNOSTICS

LED's Yes Confirm 5 Volts, SET, Fault and all Outputs.

PROTECTION

Back EMF Yes Diode protection on all outputs

Registration codes Yes Over 16 million

STOP Connection Yes Internal Emergency Stop Connection

WIRING

Wiring Loom No Upon Request
Cable Gland Yes Supplied (Not fitted)

Connections Screw terminal into plug and socket on PCB, for easy "swap out"

ENCLOSURE

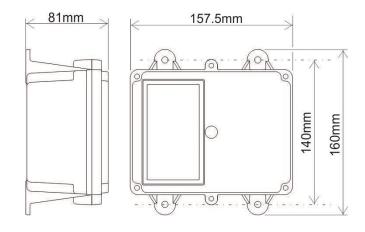

Weight 0.5 lbs (335gms)

Lid Clear PC/FR V0 and UV stabilised Black PC V0 and UV stabilised Base

Breather Gortex fitted in base 4 external lugs Mounting **Fixings** 5mm (3/16") not supplied

IP Rating

IP55

RECEIVER PCB - Component Side

This is viewable through the clear lid of the Receiver.

LED's are visible for confirmation that the system is operating correctly.

These are: -

+5V Power Supply OK

SET Receiver operational

Fault Flashes for 20 seconds

At "power up"

Tx coding window open

Fault ON = Current overload

LED's F1 to F20 and $\mbox{\it M}$

ON when there is an output

EXPLANATION OF "SHIFT" OPERATIONS - as illustrated with a 20 Function Transmitter.

These "SHIFT" operations can be applied to ALL Transmitters. For example, a 10 function Transmitter will give 20 functions – ideal if you do not want the larger 20 function Transmitter.

To operate 2 x 20 function Receivers, giving 40 functions

This is a standard 20 function Transmitter, modified so that it transmits 20 functions in two different modes.

The Green SET Button is the SHIFT button. Both 20 function Receivers can therefore be operated by one Transmitter.

Press the Green SET Button to turn both Receivers on - it will start in mode One; press it again for mode Two; press it again for mode One, and so on.

Press the Red Stop button to turn both modes off.

Receiver One (functions 1 to 20) is operated with the SHIFT buttons in mode One, indicated when the Keypad LED is flashing during operation.

Receiver Two (functions 21 to 40) is operated with the SHIFT buttons in mode Two, indicated when the Enclosure LED is flashing during operation.

To register a Transmitter to its TWO Receivers.

Switch OFF or DISCONNECT the power to the Receivers.

Switch ON or Reconnect the power to Receiver ONE, this opens a 10 SECOND registration window in its processor.

Immediately **PRESS** and **HOLD** the green **SET** button while the registration window is open until the **SET** LED lights (5 seconds), the **SHIFT** function must **NOT** be active.

Receiver TWO, repeat the process but this time **PRESS** and **HOLD** the **SHIFT** button, and **PRESS** and **HOLD** the **SET** button until its **SET** LED lights.

You have now coded the Transmitter to both receivers.
